Brief Abstract

Description

This measure* is used to assess the percent of pediatric patients admitted for inpatient treatment of asthma who received systemic corticosteroids during hospitalization.

*This is a Joint Commission only measure.

Rationale

Asthma is the most common chronic disease in children and a major cause of morbidity and increased health care expenditures nationally (Adams et al., 2001). For children, asthma is one of the most frequent reasons for admission to hospitals (McCormick et al., 1999). Silber et al. (2003) noted that there are approximately 200,000 admissions for childhood asthma in the United States annually, representing

more than \$3 billion dollars in healthcare costs. Under-treatment and/or inappropriate treatment of asthma are recognized as major contributors to asthma morbidity and mortality. Guidelines for the diagnosis and management of asthma in children developed by the National Asthma Education and Prevention Program (NAEPP) of the National Heart, Lung, and Blood Institute (NHLBI), as well as by the American Academy of Pediatrics, recommend the use of systemic corticosteroids to gain control of acute asthma exacerbation and reduce severity as quickly as possible in children with mild, moderate and severe persistent asthma. However, there is evidence that these guidelines are not followed uniformly. For example, Crain et al. (1995) found that fewer than half of respondents to a survey of hospital emergency departments had heard of the NHLBI guidelines and that there was considerable variation in use of systemic corticosteroids in relation to the guidelines. Administration of appropriate medication therapy is under the direct control of the care provider.

Primary Clinical Component

Pediatric asthma; use of systemic corticosteroids

Denominator Description

Pediatric asthma inpatients (age 2 years through 17 years) who were discharged with a principal diagnosis of asthma (see the related "Denominator Inclusions/Exclusions" field)

Numerator Description

Pediatric asthma inpatients who received systemic corticosteroids during hospitalization

Evidence Supporting the Measure

Evidence Supporting the Criterion of Quality

A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

One or more research studies published in a National Library of Medicine (NLM) indexed, peer-reviewed journal

Evidence Supporting Need for the Measure

Need for the Measure

Use of this measure to improve performance

Variation in quality for the performance measured

Measure is not provider specific

Lowest Level of Health Care Delivery Addressed

Single Health Care Delivery Organizations

Target Population Age

Age 2 through 17 years

Target Population Gender

Either male or female

Stratification by Vulnerable Populations

Results from this Children's Asthma Care (CAC-2) measure are stratified by age range:

Age 2 years through 4 years

Age 5 years through 12 years

Age 13 years through 17 years

Characteristics of the Primary Clinical Component

Incidence/Prevalence

Unspecified

Association with Vulnerable Populations

Data Collection for the Measure

Case Finding

Users of care only

Description of Case Finding

Pediatric asthma inpatients (age 2 years through 17 years) who were discharged with a principal diagnosis of asthma

Denominator Sampling Frame

Patients associated with provider

Denominator Inclusions/Exclusions

Inclusions

Pediatric inpatient discharges, age 2 years through 17 years, with an International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) Principal Diagnosis Code of asthma as defined in the appendices of the original measure documentation

Exclusions

- Patients with an age less than 2 years or 18 years or greater

- Patients who have a Length of Stay greater than 120 days

- Patients enrolled in clinical trials

- Patients with a documented *Reason for Not Administering Systemic Corticosteroids*

Relationship of Denominator to Numerator

All cases in the denominator are equally eligible to appear in the numerator

Denominator (Index) Event

Clinical Condition

Institutionalization

Denominator Time Window

Allowance for Patient Factors

Analysis by subgroup (stratification on patient factors, geographic factors, etc.)

Description of Allowance for Patient Factors

There are three distinct strata or sub-populations within the Children's Asthma Care (CAC-2) Topic

Population, each identified by a specific age range. The patients in each stratum are counted in the International Classification of Diseases (ICD) Population of multiple measures.

Age 2 through 4 years

Age 5 through 12 years

Age 13 through 17 years

Refer to the CAC ICD Population in the original measure documentation for further details.

Standard of Comparison

NQMC Status

This NQMC summary was completed by ECRI Institute on January 9, 2008. The information was verified by the measure developer on February 4, 2008. The measure developer informed NQMC that this measure was updated on June 30, 2008 and provided an updated version of the NQMC summary. This NQMC summary was updated accordingly by ECRI Institute on November 11, 2008. The measure developer informed NQMC that this measure was updated again on July 6, 2009 and provided an updated version of the NQMC summary. This NQMC summary was updated accordingly by ECRI Institute on October 9, 2009. The Joint Commission informed NQMC that this measure was updated again on July 17, 2010 and provided an updated version of the NQMC summary. This NQMC summary was updated accordingly by ECRI Institute on September 28, 2010.

Copyright Statement

The Specifications Manual for National Hospital Inpatient Quality Measures [Version 3.1a, April, 2010] is the collaborative work of the Centers for Medicare & Medicaid Services and The Joint Commission. The Specifications Manual is periodically updated by the Centers for Medicare & Medicaid Services and The Joint Commission. Users of the Specifications Manual for National Hospital Inpatient Quality Measures should periodically verify that the most up-to-date version is being utilized.
